

# SeMS Strategy (Objectives)

## ADVOCACY

Focus on promoting the adoption and implementation of Security Management Systems (SeMS) to facilitate efficient, more uniform and economically sustainable security standards and best practices throughout the aviation industry.

- Continue SeMS advocacy with international organizations, national regulators, operators, external service providers (ESPs) and industry stakeholders
- Develop synergies within an Aviation Security Trust Framework (ASTF) concepts
- Continue SeMS promotion as part of proactive security culture

## STANDARDS

Focus on the continued development of IATA Operational Safety Audit (IOSA) SeMS standards and recommended practices to ensure SeMS remains adaptable and flexible providing a structured and coherent framework for IATA members and IOSA registry participants to utilize.

- Maintain alignment of security concepts and taxonomy across standards, recommended practices and guidance material
- Develop Security Performance Indicators (SePIs)
- Evolve threat & risk management requirements

## SERVICES

Focus on providing capacity and competency building opportunities to enable and assist industry stakeholders in adopting and implementing a SeMS framework.

- Support the development and continuous review of IATA SeMS-related Training and IATA SeMS Manual
- Facilitate SeMS promotion and engagement opportunities.
- Promote and support the adoption of the IATA SeMS Certification Program
- Expand and support a SeMS stakeholder network through the SeMS Aviation Community channel platform

# SeMS Strategy (Blueprint)

## ADVOCACY

### Influencing Security Culture

- Broader adoption of SeMS from the wider aviation community (not limited to IOSA-registered entities)
- Broader recognition of SeMS by Regulators
- Promotion of the [Aviation Security Trust Framework \(ASTF\)](#) concepts

### Influencing the Security Regulatory Environment

- Promotion through advocacy and proposals at international/regional forums and through relevant [Position Papers](#)

### Promoting the sharing of security-related information

- Promote participation of IATA Member Airlines in the **SeMS Aviation Community** (MS Teams Channel, contact [aviationsecurity@iata.org](mailto:aviationsecurity@iata.org))
- Promote participation of security External Service Providers (ESPs) and Ground Service Handling Providers (GHSPs) in the SeMS Aviation Community
- Promote participation in IATA Connect & GADM

## STANDARDS

### Developing Standards & Recommended Practices

- IOSA Standards Manual (ISM): continuous adjustments and improvements
- Development of Security Performance Indicators (SePIs) for:
  - Security Incident Reporting (ISIT-IDX)
  - Threat & Risk Assessments and Risk Management
  - Quality Management & Performance

### Aligning Standards Program

- Ensure alignment between IOSA Standards and Recommended Practices (ISARPs) (for Airlines) and ISAGO (for ESPs and GHSPs)

## SERVICES

### Developing Security Content for Services

- **Certification Programs:** [SeMS CP](#)
- **Training:** [IATA security courses](#)
- **Consulting:** [commissioned security-related consultancy](#)
- **Publications:** [IATA Manuals](#)

### Aligning Service Product Content

- Ensure alignment between various IATA Manuals, Reference Documents and other related products.
  - ISM, SeMS Manual, AHM, IGOM, GOSM, IRRM...
